

# Go Green! \$ave Green!

The Orange County Conservation Corps (OCCC) makes it easy for businesses to recycle. The OCCC will provide storage carts and come to your organization, **all at no cost**. Just place the provided bin in a convenient location, place your aluminum, glass and plastic bottles in the bin, and we do the rest.

OCCC is fully insured and **certified by the State of California Department of Resources, Recycling and Recovery (CalRecycle)**. Recycling decreases your waste stream thus saving you money on your trash fees. To date, OCCC has diverted over 3,000 tons of recyclable material from local Orange County landfills.

So recycle. Help the environment. Support a local non-profit. **ALL AT NO COST TO YOU!**

To implement your recycling program today, or for more information contact: George Patino at 714-956-6222 ext. 220 or [gpatino@HireYouth.org](mailto:gpatino@HireYouth.org)

**CalRecycle - Certified Community Service Program  
Certification Number SP0243**

## Our Mission Statement

The Orange County Conservation Corps serves young, at-risk adults through employment, training and educational programs that build self-sufficiency and benefit the community through conservation-related projects.

### About OCCC

Sometimes called a "Second Chance at Success", the OCCC is for some a last chance to avoid gangs, stay free of drug abuse, avert incarceration, and ultimately ensure a positive life for themselves as working, productive members of our community.
